Adnecles1Had same problem with mine, but because I don't usually get extended warranty with mine. I took apart and there is a jumper near the battery that will reset your bios, which sounds like that is the problem. ???does it even post or just to compaq screen?. As we speak it just hangs on the Compaq screen or after the Compaq screen it goes to a black screen for about 5 seconds then restarts....repeat....repeat.....its endless! Argh!
