A while ago i started a description of all the sounds in renegade, i did the first 2200 or so, then gave it a rest.

<http://www.thecodesmith.com/images/renegade/descriptions.ini>

It already includes most of the important sounds you're interested in. All of the building attacks/destroyed messages are under the m00 prefix, just search for "under attack" inside this file and you'll find it.

The radio commands are not in this INI file, but are easy to find. They are prefixed with m00rado_dsgn, numbers 50 through 79.
