So, they shouldn't have downloaded the cheats in the first place. LOL I wouldn't know how to make it do anything to their com anyways. Maybe after I start taking computer programming next semester at school in about 4 weeks. . . and after I finish that class when school ends in mid June. . . maybe then I will be able to do something to their computer, but untill then I can't do anything except the opposite of cheats and making them get mad. I can't get the "head hacks" to work, but everything else is working fine soon I will release them. Soon meaning a day or two.
