havocide3CrimsonI'm shooting for the dual 2.4 Xeon processor system. I can run two FDS with like 32 players on each on that.

Wait and your wanting us to pay how much a month?

Server Matrix, dual 2.4 Xeons, but yet, only 1000gb BW

Yeah, I know I'll have to keep an eye on that. I wonder if Server Matrix will let me divide my 2x1000GB between the servers... the other one only used like 600GB last month.
