It is obvious that brenbot can't talk to the server using my wrapper. Check if you can connect to the wrapper using telnet, and the password is the same. This is the only solution to the problem. Also, be sure that you start the server/wrapper before brenbot, because brenbot will only attempt the connection -once-.

[HLOWTomten]The bot logs in fine to the irc channel and you can use the ingame commands but when I try to use some of the commands nothing happends.

Exampel

<br-dfc> Player ckain joined the game
<Tomten> !ids
<br-dfc> No Players
<Tomten> !players
<br-dfc> No Players
<br-dfc> ckain: Howdy HI
<Tomten> !msg hey
<br-dfc> Host: (Tomten@IRC): hey
<Tomten> !autoannounce
<Tomten> !showmods
<br-dfc> Player Angry_Viper_Jr joined the game
<br-dfc> 11Player <[SRF]>M-stfa joined the game
<Tomten> !players
<br-dfc> No Players

And I have register myself to the bot so I need to type in the password when I join the game but the bot dident tell me and when I tried anyhow I got this:

<br-dfc> You are not on the server. You can't authenticate yourself.

Anyone got a clue whats wrong, did I misstype anything in the settings files?
