Is there anything wrong with this? (btw there's no new line after program in the fds config file bit - it's just how it came out on here!)

When I run BRenBot it logs into IRC fine and identifies itself ok. Player updates also appear on the FDS. However no messages from BRenBot appear in IRC and it detects no players, even though there are some in the game. The !msg command 1/2 works - nothing appears from the bot in IRC but it does in the FDS (Egg098@IRC: test)
