Reborn

Many new and great maps released. Check out <http://www.renmaps.com>

Cheats?

Unfortunately cheats have become commonplace, however there are a few developing a countermeasure called Renguard. <http://www.renguard.com>

N00bs?

Always, especially after christmas

Sniper servers?

Crimson79 is the best one that I've played on, though there are many other well known ones that others may recommend.

Number of server?

still lots, but due to cheats the only ones worth playing on are the more reputable ones that moderate well.
