- 1.) Get a good connection and a video card (T1 the best, 56k the worst),(32 MB fair nuff, 256 the best)
 - 2.) BE AWARE at the fact that the tank can move FORWARD and BACKWARD at the same speed
 - 3.) TRY to stay on the sides of a vehicle (MRLS cant shoot you back if youre flanking it)
 - 4.) If the tank is going to a particular direction to attempt to squish you, go to the opposite direction

 - 5.) Check your six (your back) frequently
 - 6.) Listen to sounds, if you hear a stealth tank, be alert
 - 7.) *provide a tip*
-
