RenGuard isn't out yet so don't worry about that for now.

If you are going to run a sniper server I suggest using vloktbokys SSM (Sniper Server Mod). You can find it in this thread --> http://www.renforums.com/viewtopic.php?t=8422

Dante is about to release BR.NET 1.45

Good servers to play on:
Crimson79 - sniping action, moderated
n00bsvr01 - AOW, moderated
The-Pits - AOW, moderated
BCServ4 - If you want to see some of the neat server side mods vloktboky is developing.
