You could do what I did:

Make a plain white map with no hills or anything except some base buildings to purchase what you need...

Then I get my freind to pose on the map take a print screen...

Then I open it in photoshop use the wzard tool to delete the white area...

Bopy all the picture and I can put it anywhere now the background is transparent ...

NOTE: Using just one color for the background alllows youto delete the background easier.
