NHJ BV Obviously, since gay people are also a product of evolution, it's even more difficult to claim it's "wrong". Besides, I really don't see the need to reproduce with more than 6 billion people on this planet already and some 8 billion in 2025 IIRC. Evolution has a way of weeding out the defects in a species. Gays are simply a defect in our species that will eventually be weeded out through natural selection.

Javacx There is a very big difference between proving that  $1+1=2$  and proving "THESE morals are the correct morals". Very true, but are there not some morals that serve no purpose in today's society or are just flat out wrong? An Islamic terrorist has morals. He thinks it's moral to detonate a bomb on innocent civilians in a crowded marketplace. Are you going to sit there and defend him because his morals are not necessarily bad because they are HIS morals? Of course not, because killing people is wrong. So there are obviously some morals that are correct and others that are completely ridiculous.

Being gay is morally wrong to a lot of people, but most people wouldn't even care if someone is gay as long as they don't have to go around advertising it to the world, because quite frankly, no one cares.

What you do with your dick is entirely up to you. Don't go telling the whole world you like dicks in your ass. We don't give a shit and we're tired of hearing it. Take your "Gay and Lesbian Pride Parade" and "Gay Pride Month" and shove it.
