Subject: Finally,.....

I can play online again! For the past few months, every time I joined a game, within a minute my ping would shoot up to 9999 and drop the connection. I tried a few things to no avail and decided

either, though I do drop in and read several times a week. Anyway, after seeing a post suggesting running spybot and such in safe mode, I tried that along with installing McAfee Guardian/VShield (and getting rid of Norton IS). Low and behold I was able to play 10 games today without a glitch! I
