Yeah, that would be great. I created ALOT of custom cmds for BR 1.3 too.

Also i miss one command @ IRC. The "!page <nick> <message>" , i used this in combination with a script to page people where to get the maps i run on my server and where to lookup their ranks (http://zunnie.hellrazer.net).

This will probably be fixed pretty soon but the !setnextmap <map> doesnt work :S. When i do !setnextmap C&C_Alpine.mix, !setnextmap C&C_Alpine or !setnextmap Alpine they all give Error: Map Alpine not found.
