---

it matches but the prob begin when i started brenbot & br 1.3with (name bot+1)irc!  
then some how it gets mixed up prob because ports probs  
in mirc nothing in br1.3 & fds i could see everything even the commands

the lseen i typed in mirc and it showed up in br.1.3&fds(lol they came in pairs...)  
but nothing in mirc  
then brenbot starts saying something like ren\_log not found  
blabla in 120 secs  
so they asumely cant work 2gether  
btw if i start brenbot ,and then br.1.3 without irc , br.1.3 hangs
