I replied asking him what the exact reason no one has access to the box is. My next question will be to find who does. But I agree, I am talking to some EA rep about a game he knows nothing about, someone with better contacts would fair better. I would also like to point out that it IS true that in the serial email they state it is unsupported. My final note is it would be very hard to create a "keygen" because of the way it all works. (someone correct me if this is wrong). Since the serial isn't tied to a nickname I am led to believe that the server just generates a random string of numbers, registers it with WOL and calls it a serial. The only thing I can think of is if someone found out how it registers it with WOL.
