its registerd

duh... j/k

no what i meand was ..

everything was alreight,but when i run brenbot&&&blaze.net (1.3)@the same time,it didn't work anymore:S

seems that blaze.net somehow get rit of the file(renlog)prob in its own log files

then brenbot can't find it anymore,if u do a restart fds&brenbot then close brenbot it i'll update the renlog &all seems 2be oke

been running brenbot 2day just fine

btw

some times (after renstat updating) when running blazer.net it crashes on start up(meaning !rules wont show up in server events,etc)

the fix (4me)was putting results0,1,2,3,4 back in the fds/server dir.with no results on it

| Team | Score |
|-------|-------|
| 0 GDI | 0 |
| 0 Nod | 0 |

| Player | Kills | Deaths | K/D | Credits | Score | Ladder | Rank |
|--------|-------|--------|-----|---------|-------|--------|------|
|--------|-------|--------|-----|---------|-------|--------|------|

,then restart blaze.net&fds &all the command work again :S

grtz aTTack Aka Engeltjes;-)
