I can't believe what they have done to C&C. I still remember four years ago when my friend first showed me C&C TD. I went over to media-play the next day and bought the very last copy of it that they had. They said they weren't getting anymore in. When I got home I played the first mission and it was kick ass. C&C TD is still the very best of all the C&Cs. This game is more classic than Final Fantasy 6.
