BlazerThere has always been a !page command in brenbot, its in the !help and everything From irc you just do !page playername blah blah blah...

As for !rape etc, I prefer not to add anything that can be used to spam the server with.

Oops i didnt know there IS a !page :S - its not displayed @ !help i guess i was too lazy to try it ehe

What about the !amsg <msg> command? Thats very useful sometimes like when your on a map that has specific rules. Hourglass for example, i dont want any hillcampers there ...
