Well, correct me if I am wrong, but I just run a dedicated server off my computer using my dedicated server client. Couldn't everyone that hosts a server just buy a new, GOOD computer for \$1000 - 2000 and stop spending \$179 ++ a month for someone else to host? Is it more complicated then having a good computer that you can use just to host???? If so lemme know, because it's simple to me
