Subject: fdstalk.dll information
Posted by w1ley on Sun, 25 Jan 2004 15:54:25 GMT

macfdstalk.dll provides an interface to renrem.

brenbot & br.net 1.45 (new version) connect to the fds using a native renrem implementation, fdstalk.dll is no longer being used.

I am not sure if you can get specifications of the renrem protocol. You would have to ask Blazer.

now that on the other hand was actual useful information.

thank you very much.
