I had the same problem with <http://www.nitrous-oxides.net>

I set up a proxy connection and when I changed computers and lost the proxy settings I suddenly noticed it had gone...

Set yourself up a proxy connection to access the forums via, that should work.

Also check your hosts file has not strangely blocked the site (as is used to block ads in <http://www.renegadeforums.com/viewtopic.php?t=8734> ).
