Crimson has the 2 n00bstories servers setup for hosting RenAlert games, pretty speedy too. (Download RenAlert and try it, It has changed a lot over the last few versions, completely different from the initial version. No excuse for you not to play with the 2 servers up

Come and play, it's great fun, we did a 7 tank rush with light tanks, although our base got owned. The infantry rushing seems to be a tactic used at the start, well on my team anyway.

Hope we can see some more servers when the FDS is out, a few 4 player ones around, not much else though. Great fun
