OMFG LOL

"Once moved to a nearby nature preserve, the male specimen -- the largest whale ever recorded in Taiwan -- drew the attention of locals because of its large penis, measured at some five feet, the Taipei Times reported.

"More than 100 Tainan city residents, mostly men, have reportedly gone to see the corpse to 'experience' the size of its penis," the newspaper reported."

That made me laugh historically some reason, I have no idea why, but that right there made me laugh.
