This is too funny. There is this page soliciting their program. It's using simple scripts to perform a "Security Test" on your computer. It tries to make you think that you are at risk...it's stupid little scripts that any beginning web designer can put on their sites. It even has your IP and OS and Location on there. Funny thing is, it only got my OS right. Where is Laguna Niguel, United States?

Wanna see for yourself? Here's the link: http://www.syspage.com/ads/homepagesai.php?id=start1
