Quote:u type "msg hi", it goes to a "different page")makes the clicking nose

Come again?

Quote:but no commands work in the console on my computer OR the actual hosts himself

Your not supposed to enter the commands in your console, your supposed to type them in F2 (in-game) with a ! mark in front like: !msg hi or !kick playername Broke some rule etc..

Also, to be able to execute commands via IRC, you must have a voice (+v) at least and BRenBot must "SEE" you get it. If the commands dont work from IRC make sure you have at least +v and if you do have +v or higher then type : /hop >> this will auto-rejoin the channel and if you identified correct with NickServ it will automatically give you +v +h or +o or simular.

Check if you havent typed anything on the FDS itself, if you type something on FDS but dont do [Enter] then the commands dont work neither because you 'forgot' to [Enter] the last message/command @ FDS.

Also, check if these values are match in both Server.ini and BRenBot.cfg:

BRenBot.cfg:

RenRemLinuxHost = 127.0.0.1

RenRemLinuxPort = 4848 # Or simular.

RenRemLinuxPassword = 12345678 # This password MUST be EXACTLY 8 Letters/Numbers long.

Server.ini:

RemoteAdminPort = 4848

RemoteAdminPass = 12345678

RemoteAdminIP = LEAVE THIS BLANK!
