You got the blues, cause your little siggy numbers aren't moving?

Current Stress Test Level:98 players (per game)

No fear, i am here

Been working on this for, believe it or not, about 7 straight hours.

Here is the code, it is currently under stress testing atm, and should be able to actually start displaying the data from the db by this weekend, i hope to get this ladder out and done by then

Also, i will be redoing the stats images for it (service select of coarse) and will also be converting my ladder view on my site to reflect this ladder instead.

here is a screenshot, so you can see the progress, not just wonder about it....
