I've downloaded renalert and I've installed it well. I've also updated it to version 0992. but when I want to play renalert, I get an error. I've also checked the readme, it said I had to download the vb 6 runtimes. I've downloaded the VB 6 runtimes. but it doesn't work. I still get an error when I want to play renalert. does anyone know how so solve this problem?
