haremanPete it was developeing and validating the tech that took all that time. From what lunderstand the fabrication process alone for the body took thom 5 years to lick. Bit; in any case, this is another example of our procuement process at its best.

I am beginning to think each President's administration has the idea that if they didn;t start it they will be the ones to kill it <sigh>

20 years to develop one helo?

Are you sure you want to say this was a bad idea?

8 billion dollars, and 20 years, and still no helo.

If I did my job that poorly I would be fired too.
