policepolicel payed 52 fucking canadian servers, and still to this date i lag like hell, there is no update for the enormous amount of errors and glitches, if we could concentrate on making the game better by fixing it, instead of bringing in some rengaurd shit, that hackers will get rid of it as soon as it comes out, like there is no impossilbe things for people out there hacking, for an instance, look at the final renegade shit, look at it, whoever made it, has access to the main frame of renegade, and whoever is that will make further hacks or whatever you call to get rid of the freaking rengaurd crap..

That's a fucking huge run on sentence.. I tried to quote the "look at the final renegade shit, look at it, whoever made it, has access to the main frame of renegade" as it seemed funny, but then I realized that it's one huge sentence.

Laff Laff.
