What the hell is that!

First of all you look like a geek when i come to the forums your avatar puts me off, eww.

Try learning to map properly first then have a go at releasing something that people will play, it looks like what Renegade saw in the early days of official mapping, Learn Alpha Blending and maybe smoothing groups to sort out that horrible poity landscape.

Bad choice putting in that Red Chronosphere, it really does need help like revamping.

Dont complain to me ive offered my constructive criticism.
