I just got Call of Duty on Saturday, and I think it is a VERY fun game to play. Especially the dramatic escapes in the trucks and cars because of the fact that characters in the game can hand you weapons, fire accurately, fire at you realistically. And you can lean out of the window of cars etc.

UT2004 I thought it was really fun...But obviously I have not played the full yet. The demo has only like 5 maps...the full version should have over 100! It might take first place over CoD, but not just yet.

Renegade. Played it so much that Its not as fun anymore. Was good while it lasted though.
