Just registered and you think they are going to let you test RG? Fuck off clown and crawl back under your rock.

and FYI i have been playing Renegade Since Beta & have never Cheated Ever, Thats Probally why i'm still only Classed in my book as a half Decent player. & i was only offering Crimson a 24/7 public server if they ever needed one to do beta testing etc.  
and i also run many other Game servers & websites and was offering Advertising or a possible DL location too when its Released To ease The pressure if needed.

So i Suggest you Get yourself some manners Little boy.
