lol.

Any progress on this app of yours Alkaline? Im dieing to use it asap  
Im getting tired to manually add those fucktards all the time.

Am i allowed to give other people this app? SoQbololo, SoQTorro, SoQSharon, SoQNation,  
SoQDadyx, Bajadera, Synpro and some others are running servers with Bbot themselves too , i  
assume thats not a problem as long as i give them in original status?

I also gonna change my site a bit, not thats its a regulary visited one but lol.. i am probably gonna  
put it for download there if thats ok ( <http://zunnie.hellrazer.net> )
