CwazyapeCensorship has many uses. On my server I have children playing at times and prefer to not have them see "OMG YOU CARPET MUNCHER FLYING BITCH MONKEY" while playing.

Who cares lol, its just something that belongs to gaming to cuss and shout and swear a little bit. Its only absolutely uber-gay to have a kick for swearing lol.

But this is just my opinion along with probably 1000's of others who play games.
