Subject: Open in New Window?
Posted by zunnie on Fri, 26 Mar 2004 23:53:54 GMT

Ever since i reinstalled XP then when im in Internet Explorer right clicking on a link to make it open in a NEW window, the new window is not 'maximized'.

Its REALLY pissing me off to have to maximize it all the time :S
Before i reinstalled XP it used to always maximize whenever i opened Internet Explorer AND also when i choose to open it in a new window :
