If I didn't download it and use it, how the hell am I going to know what you did with it? First thing I saw was the "Construction Facility" you gayed together.

Second thing was the three defense structures and two Power Plants.

Third thing was the shitty use of textures and the symmetrical layout with the enormous "tunnels" you insist on putting into everything.

I don't say I'm the "map god." I just say your work sucks, because it does. Anything else would be lying, and if all you want is your ass kissed, fuck off and find something that'll get you that attention.
