Opening links with maximized windows by default:

Rightclick on any link on the webpage and choose to "Open in New Window"

Once the new window has opened, go back to the page where you came from and close it.

Now go back to the page you opened in a "New Window" and resize it using your mouse DO NOT USE THE MAXIMIZE BUTTON!!!

Now, after you maximized it with your mouse, press and HOLD Ctrl-key and goto "File" and choose "Close".

If this doesnt work open the Registry and goto

HKEY_CURRENT_USER\Software\Microsoft\Internet Explorer\Main, and delete the value Window_Placement on the Right Side of screen.

Restart the PC.
