Subject: Clarification
Posted by mac on Wed, 31 Mar 2004 21:43:21 GMT

1. There will be a standalone SSC. I hope to use Dante's SSC but it's unclear if he will compile it for us, and continue to maintain it. Having a SSC that is not being updated when the protocol is being enhanced/changes, it's like not having an SSC at all.

2. There are alternatives. If nescessary, I will make the brenbot SSC standalone. Not mcuh work.

3. No. We won't release without a standalone SSC.

4. Not true. RG has no ability to do ANYTHING on the FDS side.

5. Not in the first release

6. Admin messages, master server shutdowns, maintenance, etc. Only the core team members have access for that. Not going to be abused.
