Erm... right...

Well, ERA has recently grabbed itself a new server, and ive been chucked in charge of BR. Dandy. So far I've got it talking to the console, but it won't respond to commands, even on IRC. Has anyone else had a similar problem, and more importantly, does anyone know what I can do to fix it. It's quite irritating. I can never have all 3 bits working at once. IRC, BR itself or sometimes just the server. I wish they'd all just work...

Thanks in advance for help, Cas
