Titan1x77How the fuck am I clueless....I know that the mad tank uses a mammoth chassis...Im just saying your model sucks....

It's just a mammy chassis with some boxes on top with a lousy looking texture....

The fact is that Tank has 0 detail....either in that icon or on your shitty fucking model.

Im sorry, we will put some pretty flowers on it for you.

Maybe add a few thousand polygons of useless shit for your liking.

This is the MAD tank, a 3D representation of its 2D counterpart.

If theres no detail there to add then we wont friggin add it, or it wouldnt be much of a representation would it?
