or maybe since it always disconnected me from the server for having an "unauthorized game2.exe file" even though i had the right one, I tried clicking on the "renegade" button a split second before it disconnected and it crashed it? I don't know shit about your system, and very lil about computers, i'm just giving you suggestions. I just find it funny that a couple of minutes ago i didn't know shit about computers and now i'm a qualified hacker and shit.
