Subject: UNINSTALLING REN GUARD MESSED UP MY RENEGADE
Posted by RaPtER27 on Fri, 09 Apr 2004 04:28:43 GMT

have no fear i beat renguard. anyway you remove it first (i got that error too) all you have to do is go to renegade folder delete game.exe and rename game2.exe to game.exe READ THIS CAREFULLY DO NOT DELETE GAME2.EXE   now heres an explanation of what it does (taking this from myself in irc)

<RaPtER_PWNED_RENGUARD> so anyway all renguard does is change your game.exe to game2.exe and make itself the game.exe so when you click on your shortcut it auto runs the game.exe which is really ren*****

<RaPtER_PWNED_RENGUARD> so delete game.exe and rename game2.exe to game.exe and make sure theres no more ren***** files on there and your set

well reply if i have saved your day and made how renguard installs itself more easily understood

btw could you tell it was getting me aggravated when i was talking on irc?
