Subject: locked while posting, aw man

I was going to post this in reply to Invader, and ACK, I guess the time I spend is not total in vain...

Tanks

---

ACK, you generalize and base your opinion on an entire group based on the word and an individual, or two, maybe three

As for RenGuard (to get back on topic) It is currently installed and running on OZ owned GSA servers with very little incident. Yes a few users are having some trouble, and possibly expressing that in some form here. I will do what I can to help them isolate their unique technical problem, I don't do personal problems. We don't need another ACK vrs the world post.
