well, i suppose ill just have to wait until EA decides to fix it (after a few nights on the town).

ha, i was just reading the renegade manual and spotted something funny:

"Westwood is committed to keeping our games alive and growing. To that extent, we will be surprises we have in store, you can keep tabs on all things Renegade at the Renegade website."

this is EA's statement:

"EA is committed to grabbing all of your money and ruining good games, our already lined pockets are awaiting your pitiful cash. We promise to ruin every good game we take on and make members of the public do our technical support for us. We will not be fixing broken games, however we will be bringing out newer games full of holes for you to get really p\*\*\*\*d off at.....just for our amusement. (etc..)"

i'm probably so biased after playing generals for too long. its immensely irritating trying to get support from a brick wall for that game.

anyway, thanks eveyone for trying but my impatient self will have to wait a few months \*cough cough\* "weeks" for EA to fix the thing.
