Thanks zunnie... Also I have the all popular sniper mod, the one where you can host a game and have people not use pistols, Strip/WF destroyed, fixed credits etc etc, when I try and play C&C Renegade, the RG won't let me connect, "Unable to connect, Unauthorised file found" or something like that. The file was <something>.ini ... I used this mod pack and unzipped it, then copied scripts1.dll scripts2.dll and that .ini one into my Ren Data folder. Do I need to have these files in a different folder or can't I use it?
