everytime the map is over, renguard scans your game files including your always.dat (i think). I think the problem is that your game can't acces the files when renguard is scanning them so you get problems.

renguard also has been reported to slow down people's framerate, a drop as large as 20, it also causing other people to lag really bad, and there is also the not connected or renguard not installed problem that so many people are having..

Wait for the 1.01 release and see if these problems have been fixed, in the mean time I would just playon Non-RG servers.
