zunnieSCDKilleru know i think i was better asking a brick wall

Where is the question mark? Or did i miss something?

[zunnie]

Now that's a question....

Hmmm perhaps he was getting confused.

Personally, Renguard to me isnt something i wish my network servers to use(Yet). The only reason being, they are both hosted off computers and are both new. We have just built up a few regular players and i dont want to use renguard until i get a hosted and dedicated server and the clients have gotten renguard themselves...so maybe in a few months.

Besides the two pc's that they are hosted off, are not under my control physically as they are on the pc's of two people in my IRC network.
