I know you all are sick of the so called NFD. I have changed my idea once again to something that will make it useful and less annoying to all except for the ones we are aiming our actions at. Here is a description of who we are and what we plan to do.

We are a watch team of elite and experienced moron detectors. The purpose of NFD is to watch for idiots and then make sure the community is aware of their presence. We will be posting a watch list of who has been acting like a moron and who has just been acting downright like a fucktard. This watch list will either be on a separate web page or a thread on these forums. The watch list will contain these listed as followed:

Top 5 Offenders - The most irritating and the most moronic of all of the fucktards. These are people that you should make sure you do not come in contact with.

Repeat Offenders - A list of members who have more than once acted like an idiot on these forums. They may very likely become one in the Top 5.

First Time Offenders - People who have acted like an idiot but are not repeat offenders. These are people that may become a Repeat Offender and eventually in the Top 5.

Of course, once you are on this list, you are capable of being removed. This is done by your actions. If you are a first time offender and are not normally an idiot, you are more than likely only going to be on for a short period of time. If you are a repeat offender you may be taken off by what you do, but it will take a little bit longer to be taken off than if you were a first time offender. The Top 5 offenders may or may not have the capability to be off the watch list completely (havn't decided yet). I am also debating whether or not I should have a separate list of Past offenders that people can access.

This could be a useful thing to have. New members will be able to see who they should not be allied with and who they should ignore. This could also be useful to normal to experienced users as this could be a reality check to them to see them on the list. This could help them see what they did wrong and fix it.
