ROLF,
you obvioulsy have no clue on web design you retarded maggot
The site I have is not meant to be some gay ass licking community shithead, it is meant for people to leech maps and look at the ladder fucking numbnuts. First step in website design is site objective, not pretty graphics or some other lame retarded shit.

Did you even bother to look at the site? Thier are only 2 images, the UN logo and paypal button, the rest is PURPOSELY text because I am not trying to make some happy go lucky *WELCOME TO MY UBER RENEGADE* site :rolleyes:

Your the kinda of a dumbass that would put his gay fairy flowers all over the place to impress bitchass punks with your *SKILZ* :rolleyes: means visitors will return.

The site for UNRULES is meant for 1 thing: Play on the servers, download maps, and then go do something else, this is not your n00bstories community playground.

Its the same reason why UNRULES was the fastest growing mod map server, because I cut out all the bullshit and went striaght to the point.

Obvioulsy your a moron because you think unless there are some fucking pretty graphics or a retarded shoutoutbox, the site is lame. Get a fucking clue dumbass.

b.t.w. yes our servers rock and people who play on them love them
