Subject: Ren wont connect to servers
Posted by mac on Wed, 14 Apr 2004 12:38:18 GMT

I know this problem, a friend of mine had this.

This has to do with The All Seeing Eye not passing Command Line parameters correctly to game.exe, so it launches it without +connect etc.

Not sure how to solve it though. All I know it works with GSA. Try reinstalling ASE, maybe you have an old version. If you have still problems, you can PM me.
